

Application Developer / Requirements Engineer (m / f) -

Germany / Greater Mannheim or Mainz / Wiesbaden

our Client has been the specialist for complex IT tasks in southwestern Germany for more than 30 years. What distinguishes him is the flexibility of a medium-sized company combined with the expertise of a large company. With currently three locations and headquarters in the Rhine-Neckar metropolitan region, he is a framework contractor for numerous key global customers.

To strengthen the team at the headquarters in the **Rhine Neckar region**, we are looking for a dedicated on behalf of the earliest possible date

Application Developer / Requirements Engineer (m / f) - Greater Mannheim or Mainz / Wiesbaden

tasks

They collect and document the process requirements of our customers and then create a specification sheet with the requirement descriptions. These are used to customize and create new macros and add-ins for MS Office programs that will direct you to a technical team. You will find individual solutions for the wishes of our customers. Working in a team is just as much part of your job as the implementation of smaller software projects.

conditions
