About this job

Job type: Permanent

Experience level: Mid-Level, Senior

Role: Backend Developer

Industry: Software Development

Company size: 51-200 people

Company type: Private

Job description

Our Client is looking for a Back End Data Engineer to join our global team. They are looking for team members to help develop world class software products for the most exclusive organizations in the world.

This role has database design and implementation responsibilities including alternative data structures such as nosql, redis, elastic search and more.

REQUIREMENTS:

The Company looks for craftsmen developers who take ownership of their code. You can deliver quickly while being clever to avoid missteps.

You have an effective positive attitude that shines as you show your care about client and colleague concerns.

You are always learning and are a transparent communicator even when it is challenging. You thrive on challenging yourself daily and seek to surround yourself with like minded individuals.

Technically, you have 3 years experience in with complex data structures.

Well qualified applicants will have deep experience in the latest libraries and programming techniques. You will have accomplishments that showcase your capabilities by their success and technical depth.

OWN YOUR TIME

They are a completely remote team. That means they have a large amount of trust and a lot of flexibility. World travellers, young parents, nature lovers, and commute avoiders love working here. They are a collective of like minded people in over ten countries, and our global perspective shapes our every move.

FOCUSED WORK

You will work together on a dedicated team with your eye on one finish line at a time. The teams are nimble and agile, and cover the technical range you would expect in world class product delivery teams.

They believe in learning and provide unique programs that improve your tech skills, leadership skills and even challenge you in personal development. CleverFridays, guest speakers, mentorship opportunities and in-depth industry exposure are all on offer here.

And of course, if you speak at a tech conference, we cover all expenses.

RECHARGE TIME

The Company insists that you take recharge time. They are closed for major holidays and then require that you take at least two weeks a year to refresh.

Benefits

Full-Time Telecommuting

Flexible Schedules

Paid Time Off

Ability to Work with Cutting-Edge Technology

Opportunity to Work with and Learn from Top Developers

Contribute to Open Source
