

# Lead JavaScript Front-end Developer

Amsterdam – The Netherlands

**Be part of this great succes story! | up to € 80.000 + 15% bonus**

## **Your job: Lead JavaScript Software Engineer in Amsterdam**

- Are you a lead JavaScript software engineer that would like to **learn and grow with other great lead software engineers?**
- Do you want to work in an environment where they can really **help you grow your leadership and mentoring skills?**
- Do you want to **cherry pick the best engineers to build your very own elite development team?**
- How about working on **ONLY the most awesome projects here in Amsterdam?**
- And to top it all of work with **ES7, React(Native), Angular2, Vue Node, Webpack, Docker and CD?**

Then you have come to the right place!

## **Your employer: Building the most Awesome Fintech Project company here in Amsterdam**

Sometimes you look at a company and think: **“Wow, I wish I has been part of that company where they just started out. That must have been an awesome ride!”** Well, your chance has arrived! This company has best of both worlds: Vast capital, a strong vision, a very big network of most cutting edge FinTech clients/projects, amazing secondary benefits, 1 day per week paid to do PoC’s, R&D, be active in the community and spar with other Lead Engineers colleagues AND work with the most modern technologies while **never having to leave the city of Amsterdam!**

The idea is simple: Set up an **elite unite of only the best front and back end specialists to cherry pick and run the most cutting edge software projects for the Dutch Fintech Industry**, with a full focus on Amsterdam! As their mother company is the **main influencers in the global marketplace** from the beginning of Information Technology Consultancy they already have a vast group of clients dying to work with these elite teams.

Their goal is to help their wide range of market leading clients within FinTech to **disrupt and innovate markets, with hundreds of thousands even millions of customers**. The scale is vast! They only work on cutting edge projects in which they can really make an impact; do what has not been done before. Leveraging concepts like **Internet of Things, Microservices, Docker, DevOps and of course Scrum**.

If you want to help build the leader of FinTech software projects here in Amsterdam, and really help make an **impact in the lives of everyday people consuming these highly useful and innovative Financial services**, this is for you!

## **Your job: Lead JavaScript Software Engineer Amsterdam**

You as Lead JavaScript Software Engineer Amsterdam will get to **build your very own software development team**, which you will be leading on site here in Amsterdam, while working on cutting edge software projects. The nice thing is that they have **a huge list of projects, from which you can cherry pick the most interesting projects to run**. In this role you will be **involved from the very beginning**; speaking with the customer, transferring this into requirements and build the solution on projects that last between 6 months and 1,5 years, based on the best of breed technologies and methodologies. With your leadership experience you will **cherry pick the best engineers available and build successful teams**.

In projects you will be the **technological leader towards customers and your dev team**, getting requirements, sparring with them, deciding on architecture, team set up and technology stack. Allowing you to **finally really do things in the best way**, while also helping your development team be all they can be!

You will be feeding this hub of software engineering innovation and communicating about the **applications for modernizing industries** on online media channels, through **meetups and at**

**conferences.** You will call the **smartest engineers in the Amsterdam Area** your colleagues, which will quickly grow into a unit of a few dozen professionals.

You will **visit the most innovative departments** of this global organization, making connections and adding the companies best practices to your own. And next to that, the main focus will be on the **in house development of the necessary tools** here in Amsterdam to be able to service the market with the highest quality available.

You will enjoy the luxury of an **open office space built to scale**, together with multiple disruptive companies. With them you can share insights while you have a beer to celebrate the week's successes.

**Are you up for this soon to be great FinTech innovator?**
