

Our Client is a global leader in the field of robust networking and safety controls. They have solutions to improve the safety and reliability of electronic systems in the industrial and transportation sectors, with a portfolio of products that are helping to make the Industrial Internet of Things and autonomous driving a reality.

The Company was established in 1998 and today has offices in nine different countries with more than 500 employees worldwide. For the expansion of their development team in Vienna we are looking for an

## Embedded Software Developer Aerospace (m/f)

Vienna / Austria

In this technically challenging function you will work as part of the software development team in the Business Unit Aerospace, focusing on the development of embedded software for use in safety-relevant real-time systems. Depending on your strengths and interest, there are multiple chances to grow, either towards a specialist or a management role.

### Your Tasks

- Design, implementation and maintenance of embedded software for use in safety-relevant real-time systems and computer networks in the aerospace domain
- Develop software according to defined processes

- Definition and review of software requirements
- Participation in the design of software and system architectures
- Specification and execution of developer and unit tests
- Collaboration with other development teams in multi-disciplinary projects (Hardware/Software)
- Support the creation of user documentation and the customer service organization with technical expertise

## Your Profile

- University degree in a technical field of study -- preferably with reference to computer science
- **Very good knowledge of programming in C and experience with scripting for automation (e.g. python)**
- Professional experience of at least 2 years in embedded software development
- Knowledge about device driver development and/or on networking tools in Linux or VxWorks is a plus
- Experience with development processes for software and system safety as well as software configuration and build management
- Committed teamplayer willing to work in cross cultural teams
- Very good command of English, German is a plus

## Our Offer

- Opportunity to take over responsibility – turn your ideas into reality and contribute to our success story
- Exciting work environment – share our passion for high-tech innovation and cutting-edge technologies
- Unique team spirit – join a dedicated team of international experts
- Central office location – benefit from our office location in the heart of Vienna
- Flexible working arrangements – tailor your work according to your personal needs
- The “Kollektivvertrag für Angestellte des Metallgewerbes” (Collective Agreement for Employees in the Metal Trade) is applicable.
- For the above position they offer a minimum gross salary of 40,000.- Euro per year. An overpayment is determined in accordance with your individual qualification and relevant professional experience.
