Brains Consulting is recruiting for his Client – a multinational Company in IT:

Android Developer – Bucharest, Romania

- Our client was established in Zurich in 2009 with the idea to bring top fashion brands and promote individual style in the CEE countries. The company quickly grew to become the number 1 fashion destination, currently operating Bulgaria, Hungary and Romania.

At this moment they are looking for an **Android Developer** to join their team in **Bucharest, Romania**. The individual will be part of a team that develop Android applications used worldwide.

Responsibilities:
- Communicate within the mobile development team and to other teams in the organization (marketing, user experience etc.).
- Work with other enthusiastic mobile developers.
- Assume ownership and responsibility for specific tasks and modules.
- Follow the prescribed development practices.
- A mind-set of continuous improvement within the applications development process.
- Deliver across the entire application life cycle: prototype, build, test, release and support.
- Consistently write performance-minded and highly readable code using industry's best practices.
- Participate in engineering design and feature discussions.
- Deal with tight deadlines and changing requirements and priorities.
- Keep up to date on the latest trends in mobile technologies.

Requirements:

- 1+ years in developing native mobile applications for Android.
- 2+ years in developing overall.
- Comprehensive experience in working with Java, Android APIs (2.3.x, 4.0.x, 4.1.x, 4.2.x, 4.3, 4.4, 5.0, 6.0) , Android Studio/Eclipse/IntelliJ Idea, JSON, Web Services,SQLite, JIRA, source code control systems (Git, Subversion), external Android APIs and frameworks.
-Strong understanding of Android design practices.
- Successfully released at least one application into Google Play.
- Additional experience with iOS and related technologies is a big plus.
- True passion for developing mobile apps and desire to make a difference in a very crowded market.
- Strong presence as a developer.
- Calm, organized, focused.
- Analytical thinking and excellent problem solving skills.
- Open-minded, flexible.
- Great English communication skills (spoken and written).
- Strong desire for self improvement..

Benefits:

- Yearly performance review and salary adjustment.
- Flexible working hours
- The opportunity to develop a career within a stable multinational environment
- Access to the latest software technologies.
- Training and certification supported by the client non-stressful working conditions.
- Meal tickets, Medical Insurance

-
