Other requirements

Interest and personality of candidate has to be fit for the clinic and the city. If he / she has a family, so it is

very important that the whole family can imagine to be integrated in Kalmar. From that reason it is very important what sort of profession the partner has.

It is important that the candidate has thought through moving to Sweden thoroughly before going to a study-tour in Kalmar.

Description of the current clinic / health centre

The oncological clinic and radiation physics is a county-wide base unit with activities in both Kalmar and Västervik. In Kalmar there is an outpatient day care facility with 19 care places, reception, radiation therapy (two linear accelerators / True beam, CT) and five care places in the surgical department. In Västervik there is a treatment unit with 7 care places. We offer interesting and important work for our patients and we practice teamwork extensively. We participate in approximately ten multidisciplinary conferences per week (local, county-wide, regional and national). All in all, this means that oncology is a very exciting, challenging and stimulating specialty.

We have short decision-making ways and everyone can participate and influence developments. We prioritize continuing education, we have a good security culture and above all committed and skilled colleagues. We have a very well functioning activity with good finances and the most important: satisfied patients.

The clinic will build up a clinical trial unit, we will open our own oncology reception in Kalmar and take over the adjuvant endocrine breast cancer treatment from Surgery Clinic in Kalmar. From autumn 2019, the clinic will have doctor candidates (20 per semester) to do their oncology placement at the clinic.

Number of employees and occupation category
