Medicine and Geriatric Clinic in Värnamo city, Jönköping - Sweden

Requirements for education

Specialist exam in Cardiology from within EU.

General wide competence in Cardiology.

Competence in general Internal Medicine from within EU is an advantage.

Required experience

Work both at reception and department.

Experience with UKG is required.

Personal qualities required for the position

You are safe, stable and have a high degree of professionalism.

You are self-propelled and used to working in structured teams.

You work well with other colleagues and are responsive and communicative.

You make correct balances and priorities.

You are used to weighing complex information and different types of considerations.

You continuously maintain your specialist knowledge and are a knowledge resource for others.

We place a significant emphasis on personal suitability.

Further requirements

A specialist doctor supervises younger colleagues and it is naturally included in the work. The service may involve trips in the form of education / conference. We wish you have a driver's license.

On-call duty

Yes, but not during the first employment period due to introduction, language training and awaiting decision by the National Board of Health. On-call duty is later controlled by competence and experience. Emergency reception is available 24 hours a day, approximately 24 patients per day.

As a cardiologist, you vary your work between the cardiology department, cardiac intensive care and reception. Cardiology - Jönköping

Salary for staff with Swedish legitimation

Minimum 70.000 SEK / month before tax as a double-specialist.

Employed as a doctor assistant with a salary of 45,000 SEK / month with a fixed-term employment as an employment form during a 6 month period as the language develops and the introduction takes place in the workplace.

When Swedish legitimation, certificate of specialist competence and introduction are completed and issued by the National Board of Health, the employment will be transferred to permanent and a new salary will be given as a specialist doctor in accordance with agreements.

Planned date of employment

As soon as possible.

Description of the clinic

To the Medicine and Geriatric clinic at Värnamo Hospital come patients who need emergency or planned internal medical care. At the Medicine and Geriatric Clinic we treat diseases in several medical fields such as heart, lungs, kidneys, metabolic diseases,

diabetes, blood diseases, gastrointestinal diseases and neurological diseases. We provide care 24 hours a day, all days of the year in both out-and inpatient care and emergency and intensive care.

We are a large clinic with different patient and staff groups with different backgrounds and this provides an exciting and varied everyday life. We need to constantly develop new working methods and processes and we are heading for an exciting future. We work in processes within our various specialties together with employees at other clinics in medical care. The Medicine and Geriatric Clinic has four healthcare departments with 72 care places. We have dialysis unit, medicine reception and geriatric reception. We have about 300 employees. Among others, we work according to the model of Right Used Competence (RAK). We are trying to develop and find new schema models that will better adapted to our employees.

The care departments also have a project to work close to pharmacists, so-called "pharmacists in care", which is a unique project in the region of Jönköping county. We also work with mobile geriatric teams and palliative teams where doctors and nurses visit patients with special needs at home. Together, we want to achieve commitment and participation, and we want our employees to be able to develop in a good way. We strive for providing equal and good care as well as high accessibility to the patient.

Cardiology In cardiology, people with heart diseases are treated. The largest groups are angina pectoris, myocardial infarction, heart failure, heart valve disease and arrhythmias.

Cardiac intensive care is conducted at all three hospitals in the county.

At cardiac nursing receptions, cardiac nurses follow up and plan immediate treatment during their care after a cardiac event. They also plan for further cardiac rehabilitation efforts, such as cardiac gymnastics, and educate in lifestyle issues and health. Cardiology - Jönköping

For pacemaker and ICD receptions, patients come with pacemaker or ICD (inoperative defibrillator) to be controlled.
