

Anaesthesia Specialist Doctor

Thoracic-Vascular Clinic, University Hospital in Linköping

SWEDEN

Anaesthesia Östergötland

Thoracic-Vascular Clinic, University Hospital in Linköping

Requirements for education

Specialist in Anaesthesia and Intensive Care from the EU

Job description

Work with Thoracic Anaesthesia and Intensive Care including on-call duties at Thoracic-Vascular Clinic in the University Hospital in Linköping.

Required experience

At least five years of experience in clinical work after graduation as a specialist.

Has to be independent as a general anaesthesiologist.

Experience in Anaesthesia and Intensive Care within the Cardio-, Pulmonary and Vascular Surgery is required - i.e. Thoracic Anaesthesia (adults).

Competencies and skills required for the position

Independently able to provide and responsible for Anaesthesia, master Perioperative Care and advanced Intensive Care.

Master regional anaesthesia, plexus blockades and administer central venous passages and dialysis CVK.

Good knowledge of hemodynamics and monitoring cardiac function.

Good knowledge of cardiopulmonary physiology and vasoactive and inotropic drugs.

Knowledge and cardiopulmonary-assist and extracorporeal circulation with among others cardiopulmonary bypass machine and ECMO.

Basic knowledge of echocardiography.

Has to be able to perform lung-anaesthesia with single-lung ventilation with double lumen tube.

Master anaesthesia and monitoring at TAVI and other endovascular valve-intervention.

Anaesthesia and surveillance in endovascular intervention.

Personal qualities required for the position

Calm and safe with high skills. Anaesthesia - Östergötland

Team player in the team around the patient. I.e. good cooperation with anaesthesiologists, surgeons, physiologists and cardiologists, as well as nurses and sub-nurses.

Interested in developing new technology and own skills. Interested in teaching students and colleagues.

On-call duty

Two on-calls on Thorax Anaesthesia and Intensive Care 24 hours a day. A primary on-call that is linked to the hospital and a standby duty. Responsible then for the thorax intensive vein and the intermediary department with newly operated patients.

Responsible for anaesthesia and assessments of acute patients enrolled at Thorax-Vascular Clinic.

Other requirements

Good command of English.

Salary for staff with Swedish legitimation

The usual salary is between 58.000 and 75.000 SEK, depending on professional background.

The lowest sum refers to those specialists who are newly graduated and the highest is for those who are head-doctors. With min. 5 years of experience as a specialist the salary can be expected to be between 60-70.000 SEK.

Planned date of employment

November 2019 (after completing Swedish language course on C1-level).

Description of the goal of activity

Offer high-quality care in Cardiovascular and Vascular Surgery for residents, about 1 million people. For these, also offer advanced cardiac intensive care with inotropic drugs

and mechanical assist so-called cardiac pumps when other intensive care in the home-based cardiovascular care department is insufficient.
We are a University Medical Clinic with high-quality research and teaching.

Description of the work at the actual clinic

Description of the clinic

The Thoracic-Vascular Clinic has 235 employees, including 45 doctors with specialist competencies in Cardiopulmonary and Vascular Surgery and Thoracic Anaesthesia and Intensive Care. Many of the nurses are specialist nurses in Surgery, Anaesthesia and Intensive Care.

We have an operation department with four operating rooms and work at the Intervention Unit with Endovascular Vascular Surgery and Valve Surgery.

We have 8 + 5 intensive care places for post-operative care and cardio intensive care. Anaesthesia - Östergötland Care places at the division, 24 + 10.

We perform almost 800 cardiopulmonary interventions / year and we are Sweden's 4th largest centres in the field. In addition, about 600 vascular interventions are performed both openly and with endovascular technique. TEVAR and EVAR under strong development.

Reception activities in both Linköping and Norrköping.

Research permeates the activity. We have three professors, six docents, many PhD doctors and nurses and several PhD students in postgraduate education.

The clinic is in an expansive phase and a large waiting list. The medical results are good.

Further information

Of the 45 doctors there are about 15 Thoracic Anaesthesiologists. We are going to have a generation shift within the next 2-5 years and do not have specialist doctors to fill with. This is explained by the fact that we have not had our own ST doctors, but relied on recruiting specialists. However, this has proved to be difficult to meet the need for customary recruitment, why we now also try recruitment abroad. We are primarily seeking specialists with experience in Thoracic Anesthesia but also specialists with good knowledge and skills in

Intensive Care are requested. Younger specialists with less experience in Thoracic Anesthesia and Thoracic Intensive Care can come to question if they are of great interest and want to focus on investing in education and research.

Services offered by the Employer and psrtners:

- During the personal visit which is part of the interview process, the cost of travel and accommodation is financed
- 6 months long, free Swedish course, financial support during the course (the amount is topic of negotiation)
