Additional Information

For our client near Ridderkerk we are looking for truck drivers in the transport of sea containers. Mainly the transported product is food. Because of this the drivers needs to pay special attention to safety issues during the transport (hygiene, safety seals, internal gasses in the container, etc).

It's not a very diverse job, as most of the trips are almost the same. After the container is dropped off at one of the terminal on one of the harbour, the driver drives back to the base in Ridderkerk to pick up another container. Usually between 3 and 5 trips between Ridderkerk and the Europoort are done during 1 day. Important to tell is, that the container never has to be loaded or unloaded by the driver. The containers only need to be transported and the trailer needs to be changed after the destination is reached.

The trucks are EURO 5 or EURO 6. Most of them are not brand new, but very well serviced.

The possibility exists, that a driver will get a truck with a manual gear transmission. ALL THE DRIVERS COME HOME AFTER WORK AND SLEEP IN THEIR OWN BED IN THE HOUSE

ATENTIE!!! Inainte de angajare se va sustine un interviu cu angajatorul in care se verifica cunostintele conversationale de limba engleza / germana ale candidatului.
