Data Engineer

The Netherlands / Utrecht
(Remote)

Your employer:

The organization has its origins in the Netherlands, so their development hub is also located in the heart of Utrecht. You will work in a very flat and transparent organizational culture. As an engineer you have a lot of freedom and confidence here.

Your role:

- In your role as Data Engineer Utrecht you will work in a highly skilled and experienced team of Data Engineers and Data Scientists. Of course you will also collaborate with other developers like backend & front-end.
- You and your team will focus various big data challenges around their high available and distributed systems/platform.

So the key project for now are very challenging because you and your team will develop a new Data project from scratch. Currently the company has developed other solutions, but as the company is rapidly growing a **new data lake** is needed.

Also improving current but building new data pipelines will be important. On the roadmap there is a plan for building a brand new Machine Learning forecasting pipeline, which had hardly been done before like the want it. So working here means working on the edge what has been done with technology.

What is being asked?

-A technical Bachelor or Master, such as Computer Science or A.I
- **At least 2 years of Data Engineering experience**
- Software Development experience is a plus
- **Experience with Python**
- **Experience with Spark en/of PySpark**
- Experience with AWS and/or Terraform is a plus
- Experience with Kotlin, Java and/or Scala is a plus
- Experience with Elasticsearch is a plus

What's is being offered?

Salary between € 50.000 and € 75.000 based on knowledge and experience
Stock options between € 20.000 and € 30.000
The possibility to work 32, 36 or 40 hours & to allocate hours completely freely
Both remote and office work possible
25 vacation days, but these are not tracked

Laptop of your choice

Have you always wanted to work for a very well-funded tech scale up that builds products for a sustainable world?

Working location:
remote
